

DHUSHYANTH

Cybersecurity & Digital Forensics Student

gm.dhushyanth@gmail.com | 90038325 | linkedin.com/in/gm-dhushyanth/

Professional Summary

Cybersecurity & Digital Forensics student at Ngee Ann Polytechnic with hands-on experience in network security, penetration testing, digital forensics, SIEM deployment, cloud architecture, and AI analytics. Experienced in academic and industry-based projects involving threat detection, risk assessment, malware analysis, and machine learning support. Strong analytical and problem-solving skills with a passion for cybersecurity, emerging technologies, and continuous learning.

Education

Ngee Ann Polytechnic – Diploma in Cybersecurity & Digital Forensics

2024 – Present

- Cybersecurity Operations & Threat Intelligence
- Digital Forensics & Malware Analysis
- Cloud Architecture & Technologies
- Cyber Governance, Risk & Compliance
- Ethical Hacking & Penetration Testing

ITE College West – Higher Nitec in Data Engineering

2021 – 2023

- Data Science Programming – Using programming languages for data analysis.
- Data Processing & Extraction – ETL techniques and data handling.
- Data Storytelling & Visualization – Presenting insights through dashboards and analytics.

Projects & Technical Experience

- **Cybersecurity Operations & Threat Intelligence:** Deployed and configured Wazuh SIEM solutions for intrusion detection, log analysis, and threat monitoring. Created detection rules and monitored security events to identify suspicious activities.
- **Digital Forensics & Malware Analysis:** Performed malware analysis using Advanced static and dynamic analysis techniques to identify malicious behavior and attack vectors. Conducted forensic investigations to recover digital evidence and prepare examiner reports.
- **Cloud Architecture & Network Security:** Designed secure cloud infrastructure involving VPC configurations, servers, and firewall deployments. Applied system hardening techniques on Windows and Linux environments.

- **Cyber Governance, Risk & Compliance (GRC):** Developed a cybersecurity risk assessment for a simulated healthcare organization by identifying critical assets, conducting risk analysis framework-aligned with compliance requirements and industry standards by mitigation strategies to strengthen security posture.
- **Ethical Hacking:** Performed ethical hacking and penetration testing to identify vulnerabilities, simulate cyberattacks, assess security risks, and recommend remediation measures.

Internship Experience

ST Engineering – Group Engineering Centre, Video Analytics Department

Internship | Apr 2023 – Sep 2023

- Assisted in video analytics projects involving image labeling, object tracking, and dataset preparation for AI/ML model training.
- Supported radar analytics initiatives through radar map annotation, analytics testing, and data processing for pattern recognition applications.
- Contributed to the development of an in-house Large Language Model (LLM) and gained exposure to AI, machine learning, and generative AI technologies.

ITE Entrepreneurship Club – Botanica Venture

- Co-founded a student-led startup focused on propagating and selling indoor potted plants.
- Utilized smart plant wall systems equipped with sensors to monitor environmental conditions and optimize plant growth.
- Managed plant sales, operations, and collaborative business planning, generating approximately SGD 3,000 in revenue through sales conducted at the school plaza targeting students and teachers.

Skills

Cybersecurity: Network Security, Firewall Configuration, SIEM Deployment, Penetration Testing, Ethical Hacking, Malware Analysis, Digital Forensics

Technical: Python, HTML/CSS, Cloud Architecture, Networking, Microsoft Power BI, AI/ML Data Annotation

Soft Skills: Analytical Thinking, Problem Solving, Collaboration, Communication, Time Management
